PRINCIPAL ACTIVITIES AND REVIEW OF THE BUSINESS

The principal activities of the Company are the refining, distribution and marketing of petroleum products in the United Kingdom. The principal subsidiaries of the Company at 31 December 2007 are listed in note 11 to the financial statements.

During 2007 profits continued to improve, mainly driven by higher refining margins. Retail continued to consolidate its position in the market and despite intense competition had a good year. Self help initiatives have also resulted in lower operating expenditures.

The Company continued to meet the changing and wide ranging demands of its customers, whilst operating to the highest standards of operational integrity.

PRINCIPAL RISKS AND UNCERTAINTIES

The Company's principal risks and uncertainties comprise health and safety, environment and financial risks. Details regarding health, safety and environment and financial risks are provided below.

FUTURE DEVELOPMENTS

The Company intends to remain a major refiner and marketer of petroleum products in the United Kingdom.

KEY PERFORMANCE INDICATORS

The business of Esso UK Limited is managed on a divisional basis and performance is measured in areas such as safety, environmental, operational and financial. Performance indicators are regularly shared with divisional management including representatives of the ultimate parent company Exxon Mobil Corporation.

Given the straightforward nature of the business, the Company's directors are of the opinion that analysis of the financial statements using key performance indicators is not necessary for an understanding of the development, performance or position of the business.

FINANCIAL RISK MANAGEMENT

The Company's operations expose it to a variety of financial risks that include the effects of changes of market prices, credit risk, liquidity risk, interest rate risk and foreign exchange risk. The Company has in place defined systems and processes that seek to limit the possible adverse impact on the financial performance of the Company.

Price risk - The Company is exposed to fluctuations in the oil, petrochemical and gas prices as a result of its operations. The Company does not use derivative financial instruments to manage the risk of fluctuating prices and as such no hedge accounting is applied. The Company will revisit the appropriateness of this policy should the Company's operations change in nature.

Credit risk - The Company has implemented policies and procedures which require appropriate credit checks on potential customers before sales are made. The Company also has systems and processes to ensure the ongoing monitoring of customer credit worthiness and has in place procedures to enable it to respond to customers whose change in credit risk is detected.

Liquidity risk - The Company actively manages its finances to ensure that it has sufficient available funds for its operations. It is the directors' understanding that the Corporation will continue to provide suitable resources to the Company to meet its needs. The Company has a process in place to monitor the best financing structure for the Company and periodically reviews its strategies. Following such review, loans may be repaid prior to their maturity date or extended or replaced by alternative funding arrangements.

Esso Petroleum Company Limited
REPORT OF THE DIRECTORS
for the year ended 31 December 2007

FINANCIAL RISK MANAGEMENT (continued)

Interest rate risk - The Company can have both interest bearing assets and liabilities, these are generally held at floating rates. The Company monitors its portfolio of interest bearing assets and liabilities and their financial impact. The Company will reconsider the appropriate structure of its portfolio should the Company's operations change in size or nature.

Foreign exchange risk - The Company may have assets and liabilities denominated in foreign currencies, predominantly US Dollar and the Euro. The Company does not use derivative financial instruments to manage the risk of fluctuating exchange rates and as such no hedge accounting is applied. The Company has in place a foreign exchange policy and will reconsider the appropriateness of this policy should the Company's operations change in nature.

The Company is committed to continuous efforts to identify and eliminate or manage health and safety risks associated with its activities.

The Company's key principles and commitments in the areas of safety, health and the environment, among others, are consistent with those of its ultimate holding Company, Exxon Mobil Corporation. Each year, Exxon Mobil Corporation publishes a detailed and comprehensive Corporate Citizen Report that gives a full account of its positions, actions and performance.

In July 2006, another Group Company, Esso UK Limited, published a UK and Ireland Corporate Citizenship brochure that provided examples of corporate social responsibility in key areas such as health and safety, the environment and community.

Copies of these publications can be obtained by writing to ExxonMobil Information Services, PO Box 30, Alton, Hampshire GU34 4PY, sending an email to esso@mmcltd.com or phoning 01420 - 525534. Alternatively, they can be viewed on www.exxonmobil.co.uk on the publications page of the news room.
